

f2 System Configuration Requirements Version 7.0, January 2016

The **f2** application requires a physical or virtual Microsoft Server with the following minimum specification: -

Microsoft Windows Server Platform with:

Single CPU + RAID + 4GB RAM

MS Windows Server 2008 Standard Edition

MS SQL Server 2008 R2 or 2012

MS SQL Server 2008 R2 or 2012 Reporting Services and MS Report Builder 2.0 or 3.0

MS ASP.NET (Version 4.0)

MS FTP

MS Common Files

MS IIS 7

Client-side Configuration

Software - MS 7

Valid Browsers- Chrome / Internet explorer 10 / Mozilla Firefox / MS Edge

Preferred Partition Disk Layout (Raid 5)

C: System 30GB

D: Applications 80GB

E: Data 80GB

Notes: -

1. A local admin account on the server or a domain account which has local administrator rights on this server is required if feasible. This is needed for installation and configuration purposes for the **f2** application environment, both for the initial setup and for ongoing support & maintenance.
